### ECO-ARTS: INTRODUCING ECONOMICS WITH A TWIST

The learners at the Knowledgeum Academy had a lot of fun integrated into their Economics class through arts and crafts. They had a session where they had to cut and paste various economic terms and match them to their respective definitions in the most creative way possible. The aim was to engage the students in learning the various nuances of the subject but in a fun and interactive way that not only helps them relate to the subject better but also have a stronger grasp on the concept from the beginning.

Speechcraft Programme Finale

## PROGRESS REPORTED: FIRST PROGRESS REVIEW MEETING

The Academy hosted its first Learner's Progress Review Meeting. The educators and learners had one-on-one interactions regarding their current academic status and the scope of improvement they have in the forthcoming terms.

The students got the opportunity to speak to all their teachers personally and receive their honest feedback; they also got to interact with them in their parents' presence making the meet more constructive and laid the foundation for future review meets. All academic reviews were shared objectively and queries were clarified wherever necessary, making it a productive review meeting.

The review meeting concluded with a hearty meal that was specially made for all the learners, faculty and parents by the Yummy Millet Kitchen at the campus, showcasing a variety of dishes made of the humble grain - millet.

## ROLE REVERSAL ON CHILDREN'S DAY: IT'S NO CHILD'S PLAY!

No Children's Day celebration can happen without their beloved teachers organising something fun for them and our academy's educators are no exception. All the educators took the initiative to perform a short skit enacting their students by portraying their characteristics and mannerisms in a light-hearted way which was thoroughly enjoyed by all. They also indulged in some fun games that not only made them revel in joy but also brought in various nostalgic memories for teachers and the students alike.

The day was dedicated to the enthusiastic learners of the academy to remind them that they are precious and have the potential to dazzle if mulled correctly.

## BUILDING BRIDGES TO THE FUTURE

Delegates of the California State University and Wichita State University, Kansas visited the Academy and walked our learners through the opportunities, facilities and benefits of considering enrolling with them after their graduation.

They had a detailed session where they discussed several aspects of pursuing higher education abroad; all the necessary steps to take and every detail to pay attention to, in order to be able to choose a university that aligns with their genuine merit, talents and credentials.

## EXPLORING ARTISTIC MARVELS AT CHITRAKALA PARISHATH

The Visual Arts students along with their respective educator, Mr. Suresh, visited the Chitrakala Parishath to explore the galleries and learn about a plethora of things. The visit was aimed at encouraging them to witness, question and retrospect their artistic learning so far.

They got to explore the gallery, view the various art pieces on display and learn about them. The tour within the Chitrakala Praishath was invigorating for the artistic learners and helped them understand intricate details about a variety of art forms, materials, styles and composition.

## GLIMPSES OF BUSINESS CLASS 101

Learners experienced the 101 of Business Management during their Business Simulation session. The class was arranged in a way that allowed learners to get into the nitty-gritty of Business Management without any substantial background in the subject. The process was made simple by ensuring that the learners collectively worked on real-life case studies, strategies, threats and outcomes.

The class was a great success as it helped the students feel more acquainted with the subject, boosted their confidence and nurtured their team building qualities.

## CRAFTED IN SPEECH: SPEECHCRAFT PROGRAMME FINALE

Mr. Kathiravan M Pethi (Kadri), Guinness World Record Holder, International Speech Contest Winner, Storyteller & Public Speaking Coach concluded the Speechcraft Programme with the first batch of learners at the Knowledgeum Academy.

The programme was a blend of various elements and all of which was designed to enable learners to boost their self-esteem, communication skills, and build their team work. The programme was also introduced to the IB learners and was focused on enabling them to expand their vocabulary, think on their feet, speak on cue and further guide them to enhance their interpersonal skills.
